Technical Skills:

Programming Languages : C, PYTHON, C++,Basic Java, Basic PHP

Data Bases : SQL, PL/SQL

Web Technology : HTML, JavaScript, CSS (basic level).

Computer Platforms : Windows

Tools & Packages : NUMPY, Pandas packages in python.

Major Project:-

Project name : Air Quality Monitoring System.
Domain : IOT Using Rasberry Pi.
Duration : 4 Months
Team size : 5 members

Project Description:
Air Quality should be important in now a days ,we can live long by breathing good air. So the quantity of carbon monoxide,carbon dioxide levels are checked .

Procedure involved: processing the data and collecting the data, using the raspberry pi unit and ardunio coding.

My contribution: Leaded the team and created the coding for processing data and successfully completed the project.

During Academics:

Social Relevant Project:-
Project name : smart Business
Domain : HTML , Java Script and PHP for backend
Duration : 2 months
Team size : 5 members

Project Description: In this world ,all are fixing the prices for their products but farmer's have no chance like that. To over come that problem our team created a website which can the farmer's can sell their crops (like flipkart,amazon…)and buy crops of other farmer's.

My contribution: project finished successfully by leading the team and I mainly worked in creating the backend that works on php.
